

The introduction of appropriate physical security measures into crowded places and the critical national infrastructure is essential in ensuring that the UK is protected from vehicle borne threats. It is vital that landscapes remain safe and functional yet attractive, in order to be appreciated by the communities that use them.

Igneo is a modular seating system that offers unique contemporary styling, combined with functionality and exceptional impact performance. It can be specified to any length, using any number of modules, dependant on location and the amount of seating places required. Armrests can be installed between seating sections in most RAL colours available to match individual requirements. The seat is available in two colours as standard, coordinating with Marshalls paving.

- Successfully tested based on Government PAS Standards
- Manufactured from Marshalls' fibre reinforced precast concrete, which makes the seat an extremely durable solution, requiring minimal maintenance
- Supplied with anti-graffiti coating as standard
- Armrests made from Ferrocast for a longer life span and minimal maintenance (optional)

To create a co-ordinated result, Igneo Litter Bin, Chair and Appia Bollard complement the seat, together with the Giove Protective Planter and our stainless steel and Ferrocast sleeved bollards.

Igneo 75/40

Protective Seat

Product Name	Seat Span (mm)	Seat Height (mm)/(FGL)	Finish
Igneo 75/40 Protective Seat - centre section	1102	474	Concrete
