HOSTILE VEHICLE MITIGATION

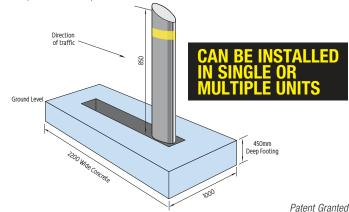

PAS 68 / IWA 14 CRASH TESTED RISING BOLLARD NO MAINS POWER NEEDED

PAS 68 Anti-Terrorist Slimline Manual Rising Bollard Using a (**18v**) Cordless Drill

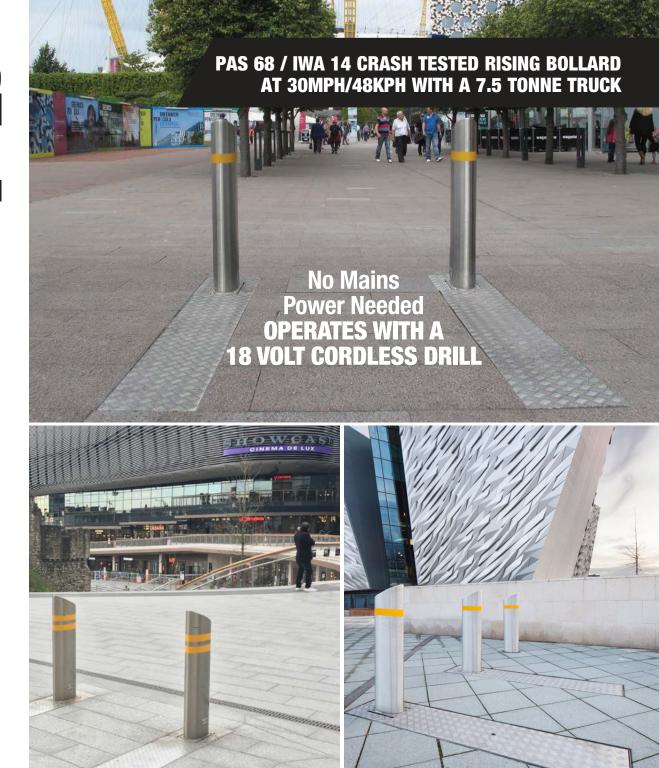

RB001-30 STOPS A 7.5 TONNE TRUCK AT 30mph/48kph

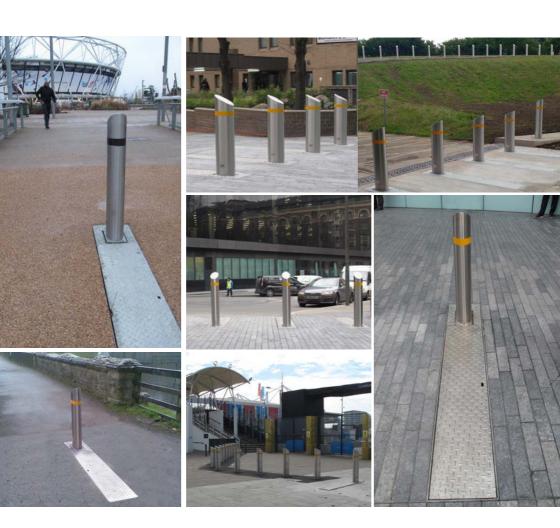

The new technology breakthrough in SHALLOW MOUNT RISING BOLLARD systems, it will keep bollard systems and ground work costs to a fraction of the old large systems. This new bollard rising system is designed by our new Micro Engineering Division to cope with today's demand for shallow mount systems in both manual and hydraulic systems.

It requires no mains power as it is **POWERED BY A 18 VOLT CORDLESS DRILL**. A new shallow rising bollard, it will stop a 7.5 ton truck at 30 mph or 48 km at 90 and 45 degrees from breaking through the security line. This system will also reduce the need to re-divert utilities. The system is the most economical on the market for both bollard systems and installation. It is also very low maintenance, once fitted as a stand alone single unit, it can follow the contours of the ground. After impact if the bollard or any parts in the system are damaged all the parts can be removed from the outer case that is concreted into the foundation and replaced. When fitted with a stainless steel bollard cover it is very aesthetically pleasing. These bollards are manually operated and require no mains power.

TRUCKSTOPPER RB001 SLIMLINE RISING BOLLARD
