### TRUCKSTOPPER 6-30

(Single shallow mount fixed/removable bollard)

The new technology TRUCKSTOPPER 6-30 has a small super light weight base plate – 46kg only. This patent pending design is a technology break through in single shallow footing bollard systems of 200mm deep, that will stop a 7.5 ton truck at 30 mph or 48 km at 90 degrees from breaking through the security line.

The 200mm deep shallow single bollard will also reduce the need to re-divert utilities. The system is the most economical on the market and very aesthetically pleasing. This system is the most economical on the market and very aesthetically pleasing. This bollard is small and easy to install. This system is designed to follow the contours of the ground and can go around corners. If the posts gets damaged after an attack they can be removed from the slipper box without removing or replacing the concrete foundation.

Once fitted the only maintenance is to repaint when needed or the bollard can be covered with a mild or stainless steel shrouds
