"New Technology breakthrough - foundation only 200mm deep"

TRUCKSTOPPER 7-40

(Single shallow mount fixed/removable bollard)

The new technology TRUCKSTOPPER 7-40 has a small and super light weight base plate (46kg only). This patent pending design is a technology break through in a removable single shallow footing bollard systems of 200mm deep that will stop a 7.5 tonne truck at 40 mph or 64kph at 90 degrees from breaking through security line. If access is needed the bollard can be removed in minutes.

The 200mm deep shallow single bollard will also reduce the need to re-divert utilities. This system is the most economical on the market and very aesthetically pleasing. This system is the most economical on the market and very aesthetically pleasing. This bollard is small and easy to install. This system is designed to follow the contours of the ground and can go around corners. If the posts gets damaged after an attack they can be removed from the slipper box without removing or replacing the concrete foundation.

Once fitted the only maintenance is to repaint when needed or the bollard can be covered with a mild or stainless steel shrouds
