PARTICULARLY WELL-SUITED FOR URBAN ENVIRONMENTS

Safe Bohus bench-barriers help create a secure and safe urban environment while enhancing the streetscape and blending naturally into their surroundings.

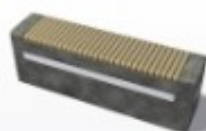

Crafted from Swedish granite from the Bohuslän region, with select items in the range crash tested to ISO 22343-1:2023, IWA 14 and PAS 68, these barriers offer both a high level of security and an attractive design.

Each unit doubles as public seating with a timber seat, so protection is built into everyday street furniture.
